

"...good communication with students and supervisor, good attitude..."

Dr. Debby Keen
Lecturer
Computer Science
Department,
University of
Kentucky

"Michael has a deceptively relaxed style, but shows clear mastery of the material and holds the students' attention..."

"Michael does a good job of drawing the material out from the students. The students are comfortable in the class, and with him."

"One of the most striking things about watching him is how evident it is that he enjoys interacting with the students, both one-on-one and from the front of the room."

Dr. Goldsmith
Professor
Computer Science
Department,
University of
Kentucky
